

CORKSCREW

The Grand Cru corkscrew – easy opening of wines.

Place the corkscrew over the bottle. Hold the neck of the bottle, pressing the tip easily against the cork and turn clockwise. Two rails keep the cork in place so that it can be easily removed from the corkscrew.

- ✓ The corkscrew itself is teflon coated so it slides more easily through the cork.
- ✓ The corkscrew pulls the cork straight out to prevent the cork from breaking.
- ✓ The Grand Cru corkscrew is designed in such a way that it complements the entire Grand Cru range.

The Grand Cru corkscrew is made from matt polished stainless steel and black plastic.

Description: Corkscrew
Design: Erik Bagger
Art.no.: 5038
Length: 18 cm
